The Rogue River Trail provides for a delightful, exceptionally beautiful wilderness hike. But the trail can present challenges and difficulties as well as delights. In general the elevations encountered are low (starting with 689 feet at the trailhead), but the trail climbs and drops multiple times, and sections of the trail are rocky. Though the trail is of moderate difficulty overall, participants may find certain sections of the trail more challenging. Hikers should be prepared for conditions such as including loose gravel, washouts, and down trees. Also, while some sections of the trail are relatively level and tucked into the forest, other sections, while reasonably safe, are narrow and 50 to several hundred feet or more above the river, so hikers who are particularly afraid of heights may find these sections of trail to be difficult. Additionally, poison oak grows in places along the trail, and ticks may be present. For protection from both we recommend you consider hiking in long pants and a long-sleeved shirt.

Be sure to wear boots that have been well broken in, and make sure that you are capable of hiking 10 miles a day at a moderate pace over uneven terrain. (Most days are shorter hikes, but you should be capable of a hike of this length.)
